

Raaphy Persitz MT 2019 – Studies Award

Judge: Amatzia Avni

Raaphy Persitz (1934 – 2009) was a dear friend. Bright, knowledgeable, versatile, kind, generous, always ready to assist and help. He excelled in three independent fields: chess, economy and linguistics.

In his obituary (*British chess magazine*) I wrote "ordinary people have a mixture of good qualities and bad ones... Raaphy Persitz was a distinct type: one sided, positive only; pure gold".

A study tourney to commemorate him drew 37 entries, of mixed level, which were delivered to me anonymously.

N. 13 by Kiryakov was already published in 1997 (Moscow-850 AT). Perhaps the composer was unaware of this.

N. 1 and N. 25 (by Tarasiuk) are both anticipated; details were handed by the TD to the composer.

The theme required "clear, straightforward, easy to understand studies". A few respectable entries were disqualified because they didn't correspond to the theme. For example, N. 16 (by Hlinka, Buyannemekh & Garcia) presents an integration of three drawing lines - in two of them a proof of the DB, exceeding human understanding, was required.

Ofer Comay acted as ty director and *Gady Costeff* checked anticipations in Hvdh5. I thank them heartily for their dedicated efforts.

Here follows my ranking; I find the chosen entries enjoyable and of a very good quality.

(6+4) White to play and win

Beautiful combinative play on the theme of overloaded pieces. Active counter play and stalemate avoidance, culminate in reciprocal Zugzwang. All this in an economical setting. Flowing, impressive play.

(5+4) Black to play, win

The double sacrifice of a rook, 6.Rd8 and 9.Re7, creates an amusing echo, as does black's defences 2.Kb4 Be7+! and 2.Kb5 Bf6!. Each of these motives have partial anticipation, but the elegance in which they are combined is admirable. During the solution white must take care to avoid stalemate traps. This work makes aesthetic impression, the central part is easy to follow and to grasp.

(10+7) White to play and win

Black's ingenious 2...Qh3!!, is parried by a counter Q-sacrifice 3.Qd6!!; and later on, by a minor promotion to escape stalemate. The heavy structure made the difference between this study and the former prizes.

The double pawn-sacrifice to force *en-passant* had been shown before (Dolukhanov & Korolkov, Ka2/Kf7 1937; Eucken, Ke7/Ke5 1948); but the motivation here behind this mechanism is fresh: it is designed to hide the mating square from both black queens. In addition, 3.Qg1!! is lovely.

After black's strong shot 4...Rc2!, the immediate activation of WK fails. But following a series of checks the BK is drawn to the center, when 9.Kg3!! now saves the day. The tries 1.Q:a2+ and 1.Qb3+ are also of interest.

 (4+3) White to play and win

A delicate miniature where decision is arrived by precise king moves and by placing the white knight twice in succession on an unguarded square: 6.Nf5!; 7.Ne3!

Black threatens to exchange his knight for the e-pawn and capture the h-pawn with the king.

White seems to have a large advantage but in fact he has to play accurately, cross several obstacles and even execute a same color light-square bishop promotion, before he can bring home his superiority.

(6+5) White to play and win

A beautiful knight maneuver. The point 5.Nh1! to liquidate into a winning pawn ending, had been demonstrated by Kaila, Ke2/Kg1, 1934. Here the play is definitely better and more elegant. The composer notes that during the solution there are four 'Umnov' but there are more than 200(!) examples of such a feat in the DB.

1.Nd1! [1.Nc4? Kh1!=; 1.Rf4? gxh2--] **1...f1Q!** **2.Ne3+ Kh1!** **3.Nxf1 g2** **4.Ng3+ Kxh2** **5.Nh1!**

Refusal of immediate capture in order to choose a better capture-square had been performed many times before, as does a temporary withdrawal of a knight from the enemy's advanced pawn. Still, the present study is neat and makes a worthwhile contribution.

Sacrifices which lead eventually to a fork of king and queen are known; e.g. Wotawa Ka2/Ka4 (flawed), 1936; Avni, Kg3/Kh5, EG 2017 N. 21353. Here we have a precise choice of white's first move and two active white sacrifices, the second one inviting check, to bring the BQ to its "forking position". One feels that the idea could be performed more economically.
